#### **DETAILED ACTION**

1. Applicant's amendment filed August 18, 2006, and the arguments presented therewith have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, the arguments are most in view of a new ground(s) of rejection. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, THIS ACTION IS MADE FINAL.

### Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 3. Claims 9,16, and 17 are rejected under 35 U.S.C. 102(b) as being anticipated by Stichter (228,692).

Stichter (228,692) discloses a scooping device comprising a substantially planar base (F) having an open end, first and second lateral side walls (E², E¹) extending upwardly along opposing first and second lateral sides of the planar base and an arcuate member (A,G), which can be considered as a handle, formed by a rearwardly extending projection integral with the planar base (F) and curved upwardly from the planar base and generally forwardly toward the open end in an arcuate manner forming a continuous curve from the planar base, the arcuate handle (A) forming a generally tubular configuration having a generally circular transverse cross-section, wherein said arcuate handle (G) further comprises a terminating end edge (see Fig. 2) in a closed position, the terminating end edge being *generally rearwardly* and *generally downwardly facing* and being positioned proximate the planar base (see Fig. 2), thereby forming a

Application/Control Number: 10/719,076

Art Unit: 3652

substantially closed cylinder having bounded and open ends thereof, wherein said open ends are substantially covered by the first and second lateral side walls (E<sup>1</sup>). Note that Stichter (228,692) shows a C-shape handle (D), but the arcuate handle (A) is capable of being held by a user's hand without the handle (D) for gripping the device.

Page 3

Re claim 16, figure 2 shows each lateral side wall having a rearwardly extending flange (E¹) having a radius substantially corresponding to the curvature of the arcuate handle thereby enclosing the lateral open ends of the arcuate handle.

Re claim 17, figures 1 and 2 also show each lateral side wall upper edges which taper forward from the rearwardly extending flange (see Fig. 2) and which is co-terminus with the open end of the planar base (see Fig. 2).

## Claim Rejections - 35 USC § 103

- 4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 5. Claim 15 is rejected under 35 U.S.C. 103(a) as being unpatentable over Stichter (228,692) in view of Brownell (6,234,549) (see PTO-892)...

Stichter (228,692), as presented in section 3 above, does not show that the material selection on the device is stainless steel. However, Brownell (6,234,549) teaches a scooping device having a blade being made of a stainless steel (Col. 7, lines 63-65 and claim 17) to prevent corrosion. Accordingly, it would it would have been obvious to those skilled in the art to make the Stichter's device (228,692) to be made of stainless steel as taught by Brownell (6,234,549) to prevent corrosion.

## Response to Arguments

6. Applicant's arguments with respect to claims 9 and 15-17 have been considered but are most in view of the new ground(s) of rejection.

#### Conclusion

- 7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
- 8. Applicant's amendment (the addition of new structural limitations in claim 9 in combination with other structural limitations) necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to PAUL T. CHIN whose telephone number is (571) 272-6922. The examiner can normally be reached on MON-THURS (7:30 -6:00 PM).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, EILEEN LILLIS can be reached on (571) 272-6928. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <a href="http://pair-direct.uspto.gov">http://pair-direct.uspto.gov</a>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
